

A Success Story from

COSTA RICA

Project PROEDUCA

COUNTRY

Costa Rica

FUNDED BY

European Union

CUSTOMER

Ministry of Education: 80 educational centers, in the regions of Guanacaste, Puntarenas, Limón, Zona Sur & Metropolitan Great Area centers in Costa Rica.

THE PROJECT

In Costa Rica, hundreds of students leave classrooms every year because of various factors such as financial troubles, learning difficulties or lack of interest.

The MEP-ProEDUCA project was conceived, through an agreement between the Ministry of Education and the European Union, with the aim of supporting principals, teachers, students and reducing the abandonment of studies in secondary schools.

The project will benefit 56 thousand students from 80 educational centers.

CHALLENGES FACED

The project accomplishment was ambitious since the goods had to be shipped to several location across the country. For this reason, it was necessary to combine different kinds of shipments and perfectly coordinate the timings of multiple actors involved in ProEDUCA Project.

SOLUTIONS OFFERED

Q&T has participated to the Project through the supply of mobile laboratories and technological sets, as well as their installation in several locations in Costa Rica.

Specifically, fully equipped science carts, along with complete technological sets. Thanks to this equipment, students will have at their disposal a safe and stimulating study environment.

RESULTS

Thanks to the project took in charge by Q&T, Costa Rica registered a boost of the quality of education levels.

The Ministry's main objectives have been reached, such as: achieving an higher equity and better conditions for learning, new infrastructures, equipment and use of technology, and creating greater capacity to tackle problems.

Despite the ambitious project, the group has fully accomplished its mission, helping to implement a modern infrastructure capable of enhancing communication and information management in one of the areas with the highest economic growth rate.
